EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul J. Farrell on June 8, 2007.

The application has been amended as follows:

In claims 2 and 7, line 5, change: " $C_i \neq C_i$ " to $---C_i \neq C'_i---$

2. The following is an examiner's statement of reasons for allowance: the present invention comprises a method and apparatus for generating a space-time trellis code (STTC) for maximizing space-time diversity gain and coding gain in a mobile communication system including at least two transmission antennas, the STTC having an information data bit stream comprised of a number of bits, the method comprising the steps of: calculating a minimum effective length for each information data bit stream; calculating product distances between information data bit streams having a length equal to the minimum effective length, wherein for each pair of all initial states and all end states for each of the information data bit streams, initial states are identical to end states; summing reciprocals of the calculated product distances and calculating minimum average product distances by determining a reciprocal of the summation

result; and generating a STTC code corresponding to an information data bit stream having a maximum value among the calculated minimum average product distances. The cited prior arts fail to teach summing reciprocals of the calculated product distances and calculating minimum average product distances by determining a reciprocal of the summation result; and generating a STTC code corresponding to an information data bit stream having a maximum value among the calculated minimum average product distances. The distinct features have been added to independent claims 1 and 6, therefore, rendering them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julia P. Tu whose telephone number is 571-270-1087. The examiner can normally be reached on 7:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chieh M. Fan can be reached on 571-272-3042. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
